Community Council Meeting Notes

Mrs. Westover welcomed everyone, we did not have any guests, but we did welcome the council to the meeting and especially the new council members were mentioned and thanked for being part of this.

All council members were in attendance

Council contact information was checked and corrected.

Councilmember Kimball had contact information that needed to be corrected and that action was taken. All other information was correct.

Council members were invited to look at training opportunities and past state-level council meeting recordings.

The Teacher Student Success Plan (TSSP) was shared with the council. It was explained how the TSSP came to be and the data in the document was shared. The data was from the Acadience Reading assessment and the iReady math diagnostic assessment. The council was informed that this TSSP is available online and at the main office.

Current year goals were reviewed and progress was stated by Mr. Ward.

The council discussed what the school's plan is for safety in the school. In particular, internet safety for students. The council was informed that the school did have Brandon from CUES come and teach this to our student body.

The council wrote two amendments to the current plan:

1. Using our carryover funds for the current year, we would like to have the flexibility to address our current goals again and use those funds to improve our Acadience reading scores. That would include other digital learning tools and classroom supplies.

2. Using our carryover funds for the current year, we would like to add math/science consumables, manipulatives, and other digital learning tools that will help learning outcomes.

The meeting was adjourned
